

**exempli gratia**

**this demo could really do something.** like make you a tasty sandwich. or get your mail for you before it gets stolen for the fourth time. or do your taxes.

well, maybe not, but we hope that it could do something or start something or be something other than just a demo. and that's the point of it all, isn't it? hope.

**we make hopeful songs.** like opening arguments to a multi-faceted debate or suggestions to be considered. not just lyrically but musically, as well.

**please consider assisting us** in our mission to get something started. we'd love to help out with the station however we can. whatever we can do to make our scene better, we are all for it.

our demo won't fix that whining noise in the engine of your car. it won't clean your house. it won't do your laundry. but it might just start something. we hope.

**thank you for all you do for the scene.** keep up the good work.

don, ian, mark, morgan.  
exempli gratia.
