philosophy:

hope. it's quite simple, really. we believe in hope. that there's a better world to be made and by working together we can create it. we believe this hope lies in music as a start to the process of change. that just by playing a song, someone might be inspired to go out and take back control of their life, their government or their world. by whatever means possible, people must again realize their power and end this despair. they must hope.

we have played with:

gatsby's american dream, fall of troy, mon frere, ambitious career woman, suffering & the hideous thieves, woke up falling, joules, patrol, lake of falcons, the senate arcade, eyes like knives, the four colour process, hollis brown, juhu beach, you.may.die.in.the.desert, masks phantoms, and others.

our perfect show:

happens at an all-ages venue or a house show, though we play 21+ shows as well. we would be playing with local bands verona, akimbo, lake of falcons, juhu beach, h is for hellgate, treasure state, pretty girls make graves, one carper green, you.may.die.in.the.desert or similar. if life were a dream, we'd be playing with like the fire theft, appleseed cast, hot water music, piebald, don caballero, mission of burma, leatherface, mock orange, cap'n jazz, rainer maria, fugazi, or jets to brazil.

in short, we hope to play shows to crowds that care about their world and with bands that are working to make it better.

let us know if this is your goal as well. we'd love to help if we can.
